

Australian Bush Flower Essences – can I use them for my pets as well?

What are Australian Bush Flower Essences?

Flower Essences are not new. They were already used by the Indigenous Australians as well as by the ancient Egyptians and in the Middle Ages Paracelsus wrote about them, too.

The Australian Bush Flower Essences work on the mind, body and spirit and are obtained by extracting the healing vibrational quality from the flowers. They work as catalysts on an emotional level, harmonizing negative feelings and belief patterns, held in the subconscious mind.

How do the Australian Bush Flower Essences work?

'Dis-ease' (not at ease with oneself) is a physical manifestation of emotional imbalances. Each emotion affects a different body part (i.e. in Traditional Chinese Medicine grief is associated with the lungs). Candace Pert, a biological scientist, discovered that hormones are released by the body, when emotions are stimulated. Specific receptor cells take up these hormones, then the emotions can be recognized and expressed, as a result the hormones dissipate.

If an emotion is blocked, ignored or suppressed, the hormones accumulate in the receptor cells. If this process is often repeated, this can lead to disease in a particular area of the body.

The Australian Bush Flower Essences help unblocking these emotions and help therefore prevent the body from developing disease.

The energy of the Australian Bush Flower Essences vibrates at a very high frequency. When an Essence is ingested or absorbed, it enters into the physical body via the mucous membranes, the digestive and nervous system. The energy then goes to the meridians, out to the outer energy layers and then back to the physical body via the chakras and meridians (see the book "Vibrational Medicine" by Richard Gerber MD).

The Australian Bush Flower Essences are as effective when taken by children and animals as they are for adults. In fact, they work exceptionally quickly on children and animals as they do not carry around as many blocks as we adults do, they have fewer emotional barriers and are more in touch with their feelings. Having no side effects, they are very safe for pets.
